QUESTION 1

QUESTION TEXT:

Fig. 6.1 shows a circuit diagram containing a battery, a light-dependent resistor (LDR) and a fixed resistor of resistance $240\ \Omega$ connected in series.

&p NOTE: This appears to be a partial question text. The complete question may include additional parts, sub-questions, and detailed instructions that were not fully captured during extraction.

QUESTION DETAILS:

- Question Number: 6
- Marks: 9
- Difficulty: MEDIUM
- Source: 5054 summer Paper

DIAGRAMS & FIGURES:

- Contains vector diagrams or physics illustrations
- References Fig. 6.1 (not included in this PDF)
- &p IMPORTANT: This question requires visual elements from the original
- Students should refer to the original question paper for complete figures
- Diagrams are essential for understanding and solving this question

ANSWER SPACE:

=====

QUESTION 2

=====

QUESTION TEXT:

An initially uncharged rubber balloon is rubbed with a woollen cloth as shown in Fig. 5.1. Rubbing the balloon causes the balloon to have a negative charge.

&p NOTE: This appears to be a partial question text. The complete question may include additional parts, sub-questions, and detailed instructions that were not fully captured during extraction.

QUESTION DETAILS:

- Question Number: 5
- Marks: 7
- Difficulty: MEDIUM
- Source: 5054 summer Paper

DIAGRAMS & FIGURES:

- References Fig. 5.1. (not included in this PDF)
- &p IMPORTANT: This question requires visual elements from the original
- Students should refer to the original question paper for complete figures
- Diagrams are essential for understanding and solving this question

ANSWER SPACE:
